

IC SILVER DT SEALEDROUND

Triad's new dual channel, enclosed ceiling speaker is as versatile as it is attractive. It's the perfect speaker for special installations such as hallways where it is desirable for each ceiling speaker to play both stereo channels for uniform background coverage. The InCeiling Silver DT SealedRound is also perfect for bathrooms, sitting rooms, etc., where there is only room for one speaker which will reproduce both stereo channels. In addition, the DT has switchable tweeter modes, making it either a dipole or bipole speaker, suitable for a variety of surround applications in smaller home theater venues.

The grill is attractive and designer-friendly, and does not use a bezel, and you have a choice of either a round or a square grill, at no additional cost. The fully-engineered steel enclosure ensures superior isolation, and provides predictable results. The speaker can retro-fit into an existing ceiling, and new construction brackets are also available. Installation is simple and straightforward. Custom paint matching is available from Triad, at a modest cost.

Features

Stereo Design.
Dual Aimable Tweeters.
Cast basket woofer.
Designer-friendly grill.

Enclosure

Engineered Sealed Enclosure.
Acoustic Suspension.
2-way/stereo design.

Finishes

Triad's Basic & Custom Finishes are available for this product. The standard finish for this product is White paint. For any other colors, please refer to Triad's Custom Match Finish program for this product. The paint we use is a top quality enamel and is applied with a light pebble finish.

Since all computer monitors and their colors vary, the digital color you see here will be different from the actual product finish.
