

IP INTERCOM AND ACCESS CONTROL SOLUTIONS FOR RESIDENTIAL COMPLEXES

VIDEO INTERCOM SYSTEMS

Discover the future of video intercom with BAS-IP.

Our advanced systems are designed to simplify your life and provide you with peace of mind. Focused on innovation and user experience, BAS-IP is constantly developing new solutions that make your home or business safer and more secure.

BAS-IP systems feature an intuitive interface and are easy to install and configure. With a wide range of features, they allow you to not only make video calls and open doors but also integrate with other security and building automation systems.

KEYLESS ENTRY

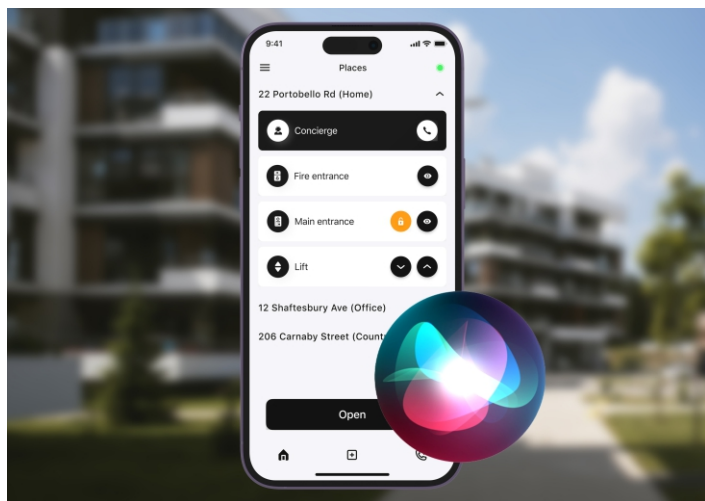

PARENTAL CONTROL

VIEWING CCTV

GUEST CAR PASSES

BEST INTERCOM APP

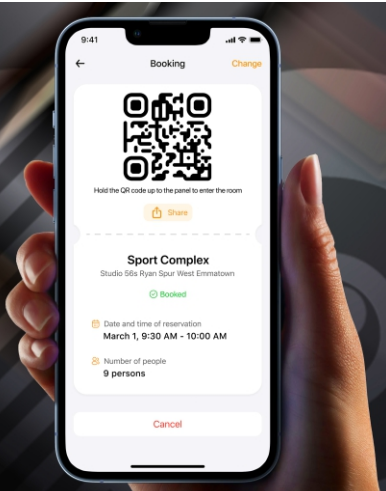

BAS-IP Link is an app that lets you receive video calls from BAS-IP entrance panels on your mobile device, unlock doors via Bluetooth or NFC, call the elevator, and create guest passes.

Key features include: push notifications for incoming calls, live video preview, support for multiple properties, guest pass creation (QR codes, access codes, and links), elevator call functionality, UKEY lock unlocking, call history access, and family member invitations.

Experience smart access control at your fingertips!

AMENITIES RESERVATION

View and order the list of amenities available for reservation

USE APPLE WATCH

CALLING LIFT TO THE FLOOR

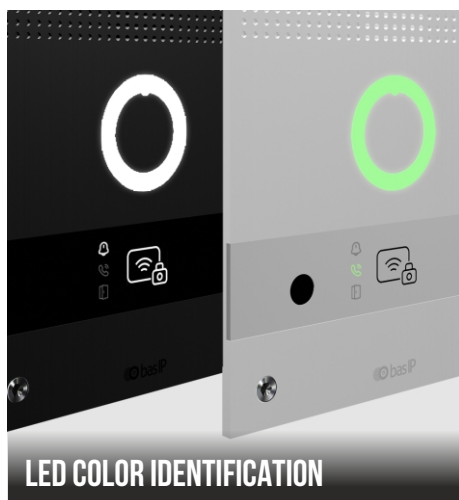

The ability to call the lift from the monitor and mobile app to your floor, as well as from the moment the lock is opened, from the monitor to the floor of the panel from which the call was made.

GUEST ACCESS AND AUTHENTICATION

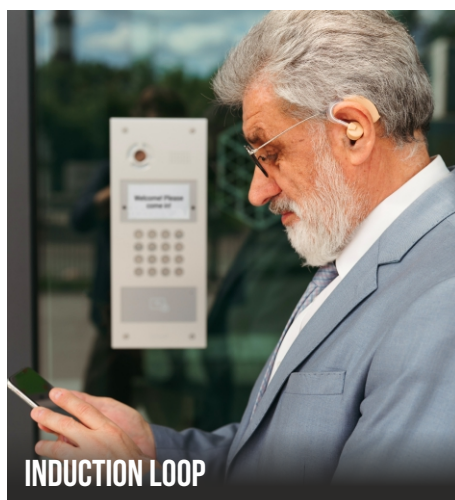

Residents of a complex can grant guest access to visitors. You can create special access limited by time or a specific number of passes.

Guest access can be used for entering the premises, opening the door of the unit, and being already near the door of the apartment, the guest only needs to press the button of the outdoor panel and hand over the delivery.

Access to the territory is carried out by providing visitors with QR codes, PINs or links.

LED COLOR IDENTIFICATION

INDUCTION LOOP

MULTI-FACTOR AUTHENTICATION

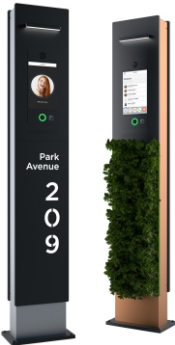

MAXIMIZE THE BENEFITS WITH BAS-IP INTEGRATIONS

BAS-IP offers seamless integration with a wide array of leading software and hardware brands, enabling customized security solutions tailored to specific client needs.

By combining the best-in-class products and technologies, we deliver comprehensive systems that enhance security, streamline operations, and provide a superior user experience.
