

IR BRONZE CENTER

Triad's legendary home theater sound and high build quality are now available in a more modest price range with the new InRoom Bronze Center. When used with the InRoom Bronze LCR or Triad's new InRoom Bronze LR-H Dolby Atmos speakers, the InRoom Bronze Center channel speaker becomes the heart of a superb home theater speaker system at a reasonable cost.

The InRoom Bronze Center has excellent detail and voice intelligibility to enhance your movie watching experience. Although it's priced like more ordinary home theater speakers, the InRoom Bronze Center channel speaker is still built one at a time in America and features premium drivers and an enclosure as solid as a bank vault. An unlimited array of custom veneer finishes and custom paint matching are available to blend with your environment.

Fully engineered, Premium MDF enclosure.
Acoustic Suspension.
2-way design.

Finishes

Triad's Basic, Real Wood Veneer & Custom Finishes are available for this product. The standard finish for this product is Black paint. For any other colors, please refer to Triad's Custom Match Finish program for this product. The paint we use is a top quality enamel and is applied with a light pebble finish. The veneer finishes are made from real wood and coated with an enamel clear coat.

Since all computer monitors and their colors vary, the digital color you see here will be different from the actual product finish.
