

# *The most beautiful sound you may never see.*

Beauty is in the eye.

The ear.

And even the soul.

It is sound you don't just hear, but feel.

Sound that inspires and moves you.

Sound you love.

# *How Triad inspired an industry.*

We are proud to be the world's first manufacturer to build fully customized speakers to satisfy the most discerning audiophiles and interior designers alike. Today there are many imitators. But none delivers the audio and visual artistry of the original.

Triad speakers are custom built to order in our factory in Portland, Oregon – from dimensions and acoustic excellence, to the perfect match of paint color or wood finish.

Our unique manufacturing process, perfected over more than two decades, combines technology, automation and the artistry of dedicated craftsmen and craftswomen.

When compromise is not an option, Triad speakers are a treasure to be discovered. Just ask your electronic systems integrator today.

# *Chosen by Dolby® to bring Atmos® to life.*

The emerging state of the art in cinema sound is Dolby® Atmos®, a dramatic multidimensional object-oriented sound technology that redefines the audiovisual experience.

To create speakers capable of bringing the Atmos® experience to home cinema, Dolby® turned to Triad.

The result is a radical new line of recessed and freestanding speakers capable of moving the sounds of individual objects all around you, even overhead.

Triad's Atmos® enabled speakers are just the latest in our commitment to enable the best audiovisual experience that art and technology can deliver.

Triad Atmos® Series speakers create dynamic, authentic sound above as well as around you. You have to experience it to believe it.

*More than sound.  
Products that enhance  
your life.*

Like no other speakers can, Triad brings the multidimensional realism of Dolby® Atmos® to your home theater, and the world's great music performances into the private and intimate living spaces of your home or yacht.

Triad in-wall and in-ceiling speakers create studio quality sound without affecting the purity of your interior design.

Our freestanding and bookshelf speakers are built to your exact specifications, including perfectly matched colors or wood surfaces, to blend into or accent your décor.

And Triad TV sound bars don't simply look amazing and fit perfectly, but deliver unprecedented sound quality.

Every Triad speaker is designed and built for you to elegantly, often invisibly, bring the ultimate acoustic experience to all the spaces in your life.

# *Available through authorized integrators and installers.*

You won't find Triad speakers in ordinary retail stores. These bespoke works of acoustic art are available through electronic system integrators and select retailers who will help you choose exactly the right products to achieve the ultimate in acoustic performance and complement your architectural design.

We would love to build exceptional speakers to enhance the soundtrack of your life. For more information and immediate personal attention, call 800.666.6316. Or visit [www.triadspeakers.com](http://www.triadspeakers.com).

Triad is located in Portland, Oregon. Since 1982 we have been dedicated to one thing: building the world's most beautiful and acoustically perfect loudspeakers for the world's most discerning customers.
